EDUCATION

Chandigarh Group of Colleges, Landran **2021 – 2025**

Bachelor of Technology in Computer Science and Engineering | CGPA: 8.5

WORK EXPERIENCE

Software Developer **Aug 2025 – Present**

TechBridge Consultancy Services | Gurgaon

ObservaX — Enterprise ITSM Platform (ITIL v4 Certified) | *Next.js, Redux Toolkit, Node.js, Express.js, Micro-frontend Architecture*

- Contributed to the overall platform architecture of ObservaX, a 9-tool enterprise ITSM platform used by [X]+ enterprise clients, collaborating with cross-functional teams to define module boundaries and align technical design with ITIL v4-certified process standards.
- Independently owned full-stack (frontend + backend) development across 5 of the 9 ObservaX tools — from requirement analysis and API/database design to UI implementation, code reviews, and production deployment — translating business requirements into production-ready features end-to-end.
- Architected the Release Management module — including multi-stage approval workflows, interactive deployment calendars, and real-time release dashboards — using Next.js, Redux Toolkit, and a micro-frontend architecture for independent module deployability.
- Designed and integrated RESTful APIs with Node.js/Express.js backend services, implementing structured error handling and data validation to power real-time dashboards and maintain cross-tool data consistency across the platform.

Remote Management System — Apache Guacamole | *JWT Authentication, RBAC, RDP/SSH*

- Maintained and restructured a legacy Remote Management System, refactoring core session-handling logic to enable zero-install, browser-based RDP/SSH access to distributed machines across the organization.
- Implemented JWT-based authentication and Role-Based Access Control (RBAC) to enforce secure, authorized-only access, reducing unauthorized access risk across multi-tenant environments.

Audio Voice Dialler System — Ericsson | *MERN Stack (MongoDB, Express.js, React.js, Node.js)*

- Owned full-cycle maintenance of a live enterprise Audio Voice Dialler system — performed root-cause analysis on data inconsistencies, optimized slow database queries through indexing and query restructuring, and sustained zero-downtime stability for [X] months in production.
- Triaged and remediated production incidents across React.js, Node.js, Express.js, and MongoDB using severity-based prioritization, shipping hotfixes and feature enhancements without disrupting live client operations.

Software Developer **Aug 2024 – Jul 2025**

GoKwik Solutions Pvt. Ltd. | Gurgaon

- Spearheaded development of key Shopify app modules, including Dashboard UI, Login Flow, Payment Integrations, and Side Cart Components, using a reusable component architecture to accelerate future feature development.
- Built secure, scalable REST APIs and streamlined frontend-backend communication using React.js, Node.js, and Express.js, including structured authentication flows and consistent API contracts across modules.
- Debugged and shipped fixes for critical production issues — including bundle size and lazy-loading optimizations — reducing page load times by [X]% and improving checkout experience for [X]+ users.

VOLUNTEER EXPERIENCE

Technical Core Member (Frontend Developer) **Jun 2022 – Jun 2023**

GDSC, CGCCOE | Landran, Punjab

- Led 100+ students in hands-on frontend development workshops and collaborative projects as a core member of the Web Development Team, mentoring peers on React.js fundamentals.
- Organized and coordinated tech events attended by 500+ students, promoting industry best practices in web development and fostering a collaborative learning community.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript
Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS, Micro-Frontend Architecture
Backend: Node.js, Express.js, REST APIs, Microservices, Kafka
Databases: MongoDB, PostgreSQL, Redis
AI / LLM: LangChain, RAG (Retrieval-Augmented Generation), Vector Databases, Prompt Engineering
Tools & Platforms: Git, Postman, VS Code, Cursor, Claude, Swagger, DBeaver, Docker
CS Concepts: OOPs, DBMS, Data Structures & Algorithms (DSA), Software Engineering, System Design (LLD), Agile/Scrum, ITIL v4
Other: Linux, Windows

PROJECTS

DocuChat — AI Document Q&A Assistant | *Node.js, LangChain, ChromaDB, Google Gemini API, Next.js*

- Built a RAG-based chatbot using LangChain (JS SDK) and ChromaDB to answer natural-language questions from uploaded PDFs, designing a full document ingestion pipeline covering text extraction, chunking, and embedding generation via Gemini's text-embedding-004.
- Implemented a retrieval-augmented generation flow using top-k vector similarity search and Gemini 1.5 Flash to produce context-grounded, hallucination-resistant responses, with a Next.js frontend featuring streaming chat and inline source citation.
